

# TRBOnet Mobile Client

## Wherever you are now - stay connected

### TRBONET MOBILE CLIENT FOR ANDROID AND IOS

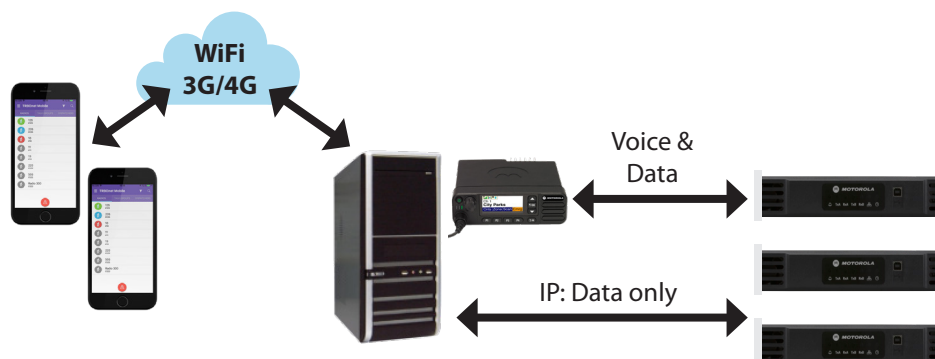

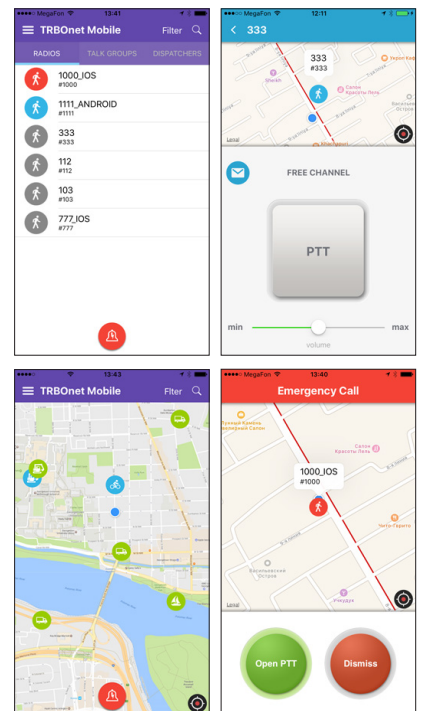

TRBOnet Mobile is an application for Android and iOS devices that extends MOTOTRBO DMR to tablets and smartphones. It works like a normal radio and delivers the most important information to the user device. The solution provides full integration of smartphones with MOTOTRBO DMR radios over 3G, 4G or Wi-Fi.

### MAKE YOUR SMARTPHONE MOTOTRBO-COMPATIBLE

The software enables your smart device to talk to MOTOTRBO DMR radio users, talk groups and dispatchers. The Mobile Client application with the software PTT button allows for radio-style communication. The software supports the following features:

- Group and private calls,
- Emergency calls,
- Text messages (both group and private),
- Dispatcher intercom,
- Online location and maps,
- Job Ticketing.

### DISPATCHER PARTNER

- Connection to the Server – WIFI or Data cellular network
- Connection protocol – UDP, SIP-based protocol
- No extra hardware or licenses from Motorola
- Features and Configuration similar to Radio
- **Important:** Voice is available only if control stations are used
