

# Off Site IT Solutions

## Solutions for reliable internet and power

### WHO

- Danimex offers solutions to cater for all IT backhaul and access solutions. The solutions are scalable and can cover from the smallest home to the largest company's IT requirements.
- In 2020, large humanitarian organizations during the COVID-19 pandemic used this solution to allow **'HOME WORKING'**.
- One company acts as a **VIRTUAL ISP**, then provides the Internet access across the whole business park

### WHAT

- Cambium IT architecture
  - ePMP- linking offices, with VICTRON power solutions
  - CNPILOT - home access points
  - CNMAESTRO - network operational maintenance
- Power:
  - Goal Zero - Nomad 50 and Sherpa 100AC

### WHERE & WHEN

Any location that needs to facilitate users working outside of the traditional 'single' office environment.

### WHY

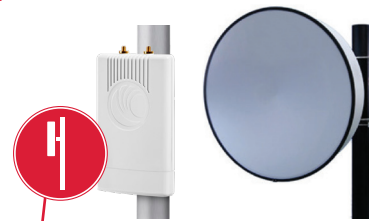

- To facilitate effective & reliable IT backhaul and last mile access solutions, thus ensuring an effective work force
- Increasing IT security
- Reduced on going ISP costs as one connections can be used by all staff
- Minimise down time
- Secure IT access from the remote sites to the office facilities

#### Danimex solar power kit

The solar power kit is ideal as a backup power for your IT backhaul equipment.
