

Integrated communication solutions

Connect with your team anywhere, anytime

WHO

In the complex world of 'communication' we experience today, there is no 'single solution' that covers everyone's needs. So Danimex offers solutions which can provide INTEGRATED communication between different mediums, which allows seamless roaming and calling across cities, countries and the world.

WHEN

When the demand and requirements for your operations has focus on high performance, increased efficiency and safety & security of your staff.

WHAT

- DMR
 - Motorola
 - Control room solutions – TRBOnet, SPTT and or AVTEC
 - AMPHENOL antennas and combiners
- Cambium
 - PTP
 - PMP
 - Indoor and outdoor WIFI access points
- GOAL ZERO
- POC (push To Talk Over cellular)
- Gateways: Analogue VHF / UHF
 - Marine and AIRBAND
 - HF (CODAN)
 - PABX, SIP, Satellite, 3/4G, GSM and public phone networks

WHERE

Anywhere that requires secure group and private communication across multiple technologies.

WHY

- To facilitate effective and reliable TEAM communication.
- Increase IT security.
- Reduce external communication costs from external providers.
- Increase team efficiency with ticketing systems.

Cambium WiFi solutions

Extending the service provider's indoor and outdoor reach and streamlining components for a simplified indoor and outdoor network.

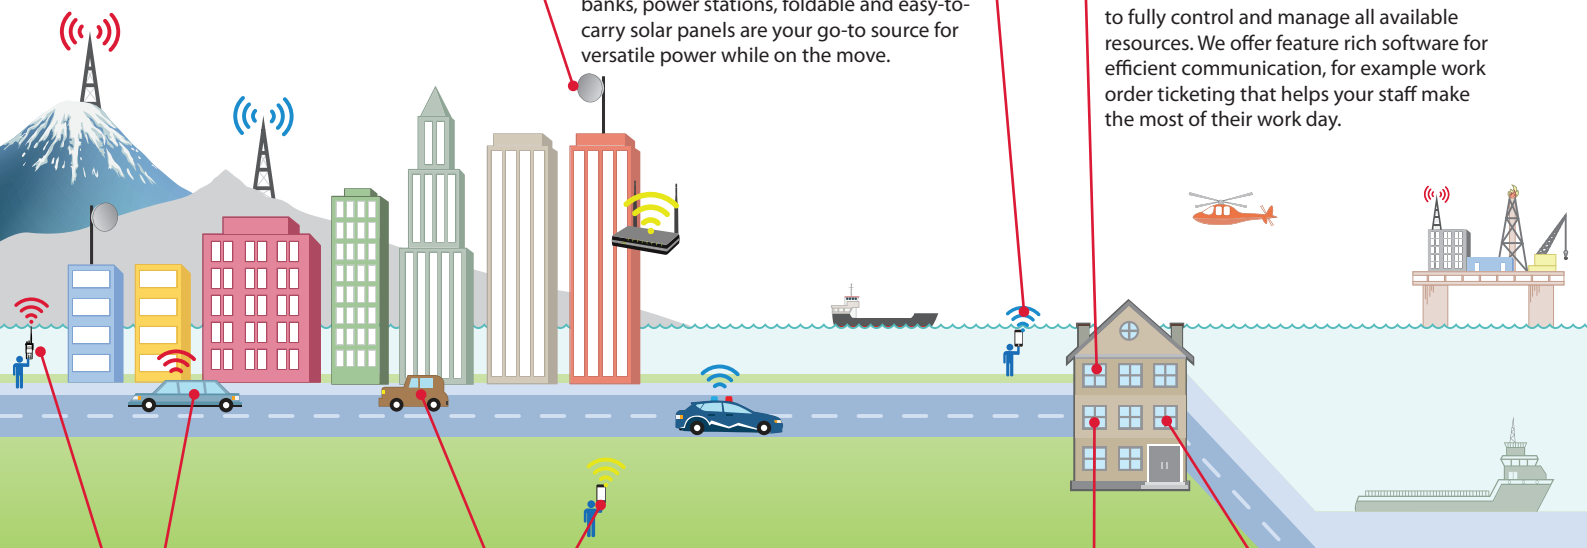

Goal Zero power solutions

The Goal Zero product portfolio is designed for rapid deployment and can easily be packed up and move around. Their power banks, power stations, foldable and easy-to-carry solar panels are your go-to source for versatile power while on the move.

Security Operational (SOC) Control room solutions

TRBOnet, SPTT and or AVTEC Control room solutions that enable a user to fully control and manage all available resources. We offer feature rich software for efficient communication, for example work order ticketing that helps your staff make the most of their work day.

MOTOROLA DMR & TETRA radios

We offer range of devices that are designed to the highest specifications with outstanding quality, range and battery life.

POC solutions

Danimex offers a wide range of rugged ATEX certified POC (Push-to-talk over cellular) devices such as smartphones, pads and tablets.

Our POC applications provide full integration of smartphones with your business needs whether that is a standalone solution or as an extension to your PMR network (Private Mobile Radio) platform over 3G, 4G, WiFi or LTE.

Gateways

To allow seamless interworking between network domain / types.

Cambium cnMaestro™

A cloud-based or on-premises software platform for secure, end-to-end network control.
