# Savox Hardline CSI-2000 Entry Kit

SAVOX Hardline Fuel Cell Entry Kit contains the equipment necessary to provide safe, reliable & continuous two-way communication between a safety attendant and confined space workers. Supports one safety attendant and fuel cell technicians with or without breathing apparatuses to a distance of 25 meters.

The equipment can be used untethered or in conjunction with supplied air respirators for general entries and maintenance in aircraft fuel cells. Accessories are available for negative/positive fuel pressure testing. Additional lengths of cable can be added to the kit to increase the entry distance to a maximum length of 1000 meters.

## KEY FEATURES

- » Intrinsically safe (ATEX / UKEX / IECEx / UL / CSA certified)
- » Hands-free/full-duplex two-way voice communication.
- » Use in encapsulated suites with respirators or any make/model of breathing apparatus.
- » Non-RF emitting
- » Conforms to MIL-STD 461
- » Chemical resistant
- » Waterproof
- » Private network
- » Cable options for up to 1000 m entry distance

# Savox Hardline Rescue Kit 1

Savox Hardline Rescue Kit 1 with Power Talk Box is a versatile technical rescue confined space kit. It enables simultaneous, two-way voice communications between the rescuers and the victim. Rescuers use it where traditional radios fail or when hands-free, secured communications are required.

Attendants can communicate with entrants and monitor their safety. The backup team can also listen to the entrants' rescue and be ready to relieve them.

The power talk box is a portable intercom system that is dropped down to the victim before entry to determine their condition.

## KEY FEATURES

- » ATEX / UKEX / IECEx / UL / CSA certified
- » Hands-free two-way communication
- » Water- and dustproof
- » Intrinsically safe for potentially explosive environments

# Savox Hardline USAR Task Force Kit

Savox Hardline USAR Task Force kit is a comprehensive, multi-purpose communication system that can be configured to according to the type of rescue mission from mine rescue to collapsed structure rescues.

## KEY FEATURES

- » ATEX / UKEX / IECEx / UL / CSA certified
- » Hands-free two-way communication
- » Water- and dustproof
- » Field proven, used by FEMA, USAR and SUSAR teams
- » Intrinsically safe for potentially explosive environments
