

Quick Deployment Kit for Game Parks

The importance of having quick deployment kits lies in their ability to facilitate swift responses, enhance efficiency and effectiveness, prevent duplication of efforts, and ensure adaptability to changing needs. Additionally, these kits demonstrate accountability and funding criteria, and enable collaboration and resource sharing within the game park community.

We recommend

MOTOTRBO R7 Radios as the essential communication solution for any organisation, offering reliable communication in challenging environments. With support for UHF/VHF frequencies, enhanced connectivity features like Wi-Fi and Bluetooth, and robust security measures, these radios ensure seamless coordination during emergencies.

Their durable design, including IP68 waterproof rating and resistance to disinfectants, makes them the ideal radio, prioritising safety and effective communication within game parks.

Explore below for a comprehensive list of contents detailing the top-notch contents of our Quick Deployment Kit. Gear up for success with our premium selection designed to meet your needs.

VHF QUICK DEPLOYMENT KIT

QTY	DESCRIPTION
1	SLR1000 VHF Repeater W/ Filter
1	Pole Mount kit
1	PSU
1	Ext Antenna (146-175Mhz)
1	Additional antenna
1	Rolatube 3,5m (136-175Mhz)
	Packed in Zarges Box (Item 4.00)

POWER INCLUDED IN KIT

QTY	DESCRIPTION
1	Yeti 1500 Power Station w/ Boulder 100BC panel
1	4.5m Extension cable
	Packed in Zarges Box (Item 5.00)

PORTABLE ACCESSORIES INCLUDED IN KIT

QTY	DESCRIPTION
50	R7 VHF Portables with all accessories but without Single Charger*
10	Single Chargers EU Plug
1	Multi Unit Charger (6-bay) EU Plug
	Optional programming of the 50 portables
	Packed in Zarges Box (Item 10.00)

*Amount can be changed based on requirements

TACTICAL HEADSET WITH PTT

The Sordin Military Headset with PTT will be an excellent choice. can be added to the kit in order to increase the wearer's situational awareness and keep their attention on the action while protecting from any loud noises.

Stay Connected anywhere!

SLR1000 VHF REPEATER W/ FILTER

The SLR 1000 repeater stands out as a the reliable choice for game wardens due to its rugged design and IP65 rating, making it suitable for deployment in challenging outdoor environments commonly encountered in game parks.

Its compact size offers versatile installation options, allowing for quick setup in diverse field conditions without extensive infrastructure requirements.

ROLATUBE IAM SYSTEM

The Integrated Antenna Mast (IAM) from Rolatube is a groundbreaking communication mast that offers high performance in challenging environments. It can be handheld, supported with guy ropes, or elevated via the rigging point, enabling dismantled personnel to quickly access high-performance communications infrastructure.

The Rolatube ensures no conductivity or signal loss when in contact with grounded objects and features an omni-directional antenna that significantly increases range capability and performance for communication solutions compared to traditional equipment.

Quick charging with Goal Zero!

POWER YOUR GEAR

Portable power stations are essential tools for organisations operating in remote, off-grid, or disaster-affected areas. They provide reliable electricity to support critical operations, helping ensure that essential equipment remains powered when traditional infrastructure is unavailable.

In challenging field conditions, power stations enable smooth and continuous operations by supplying energy for medical equipment, communication systems, lighting, and temporary facilities. From mobile clinics and command units to emergency shelters and field missions, these versatile solutions deliver dependable power to keep teams connected, operational, and effective when it matters most.

EASY-TRANSPORTABLE BRIEFCASE SOLAR PANELS

The Boulder 100 Briefcase Solar Panel is another valuable asset due to its rugged, durable, and rigid design. It features strong tempered glass and an aluminium frame with added corner protection, making it suitable for both temporary and permanent installations. The integrated kickstand allows for optimal angle adjustments to maximise energy harvesting from the sun.

The kit will come in a Zarges box. Crafted from rugged aluminium, Zarges boxes offer unparalleled protection for your valuable goods. With a robust, stackable design, customisable features, and heavy-duty hardware, these boxes are built to withstand the toughest conditions.
